

PATIENT CHECKLIST

Whether you are new or a valued continuing patient to your office, please review the ensuing checklist before your appointment. Doing so helps Dr. Shelton serve you best, while also minimizing your registration time.

- If you are a new patient or have not updated your information in the past 3 years you print our Patient Information Sheet and Notification of Privacy Practices form to fill out and bring it in with you to your appointment.
- A Patient History Question is also available for you to print and fill out prior to your appointment if you feel this would be an easier way let the Dr know of your medical history.
- Bring with you a list of all the oral medications you may be taking, including over the counter supplements.
- Bring a list of any eye drops you may be using, both prescription and over the counter.
- Bring your insurance cards (vision and medical) so that we can file your visits appropriately.
- Bring all eyewear (indoor and outdoor) you currently wear or use.
- If you are a contact lens wearer, please bring in the boxes or blisters packs which indicate your lens parameters. Along with this, please know which contact lens solution you are using.

Due to the thoroughness of our initial examination, please plan on spending approximately 50-60 minutes in our office. We look forward to seeing you for your appointment!
